Spot the Stripe!

An animal's coloring and pattern are not only pretty, but they can also be pretty important to that animal's life.

As you explore the zoo, focus your attention on the spots and stripes around you by playing the $Spot\ the\ Stripe$ game.

For every animal you see that has lots of stripes or spots, you score one point.

For every animal that has a few (2-5) spots or stripes, you score two points.

For every animal that has only one spot or one stripe, you score three points.

For every animal that has both spots and stripes, you score five points.

Here's the catch - whether it's one zebra or twenty zebras, you only score one point!

Good Luck!
